LEADERSHIP & INITIATIVE

Founder & Lead, GDG on Campus GCTC *Aug 2025 – Present*

- Founded and established the Google Developer Groups on Campus chapter at Geethanjali College of Engineering and Technology.
- Achieved Tier 3 in the Google Cloud Study Jams campaign and hosted GSoC awareness sessions for students.

Administrator, GCTCPortal *Feb 2026 – Present*

- Selected as one of the college's student administrators for gctcportal.in — a competitive, single-seat annual appointment.
- Managed academic notifications, marks updates, and college-wide announcements via the portal and official Instagram handle.
- Served as Sub Core – Technical for the college fest committee, overseeing technical event coordination.

PROJECTS

Smart Power Consumption Predictor | *GitHub*

- Built a regression-based ML model (XGBoost) to predict household power consumption, applying feature engineering and preprocessing pipelines with NumPy and Pandas.
- Evaluated performance using scikit-learn metrics (MAE ≈ 0.09 kW, R^2 ≈ 0.95) and visualized consumption trends and feature importance using Matplotlib and Seaborn.

AI Descriptive Answer Evaluation System | *GitHub*

- Co-built the backend evaluation pipeline in a 3-person team — PaddleOCR and PyMuPDF for handwritten-answer text extraction, Sentence-BERT cosine-similarity scoring against instructor-provided model answers, with SQLite persistence and ReportLab report generation.
- Owned deployment (Railway), taking the system from local prototype to a live Flask application with role-based Faculty and Student portals.

Job Notifier | *Github*

- Built an automated job-matching tool (Python) that scrapes Adzuna and Arbeitnow APIs, filters listings by role fit, experience level, and location eligibility, and delivers daily email digests via GitHub Actions — built to solve my own job search friction as a fresher.

SKILLS

Programming Languages: Python, Java, C

Libraries / Frameworks: NumPy, Pandas, scikit-learn, Matplotlib, Seaborn

Tools / Platforms: GitHub, VS Code, Figma, Jupyter, Google AI Studio, Firebase

Databases: MySQL

EDUCATION

Geethanjali College of Engineering and Technology, Hyderabad *Aug 2023 – May 2027*

B.Tech | Artificial Intelligence and Machine Learning
